REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Neither Bithell nor WO 98/35708 to Chollet et al. teach or suggest a method of or apparatus for plasma sterilization (i.e. electrical discharge) of an item including a step or control system configured for performing a step of "adding water vapor and ozone to the chamber such that said electrical discharge produces OH radicals from said water vapor and said ozone so as to contribute to sterilization of at least part of the at least one item, said adding being performed so as to increase the pressure of the atmosphere within the chamber until the pressure reaches between 5 torr and 15 torr and said electrical discharge is broken," as required by instant claims 1 and 20.

In fact, Chollet et al. teaches adding ozone and water vapor to the chamber *only prior* to a step of plasma generation. The ozone and water vapor are added to the chamber, permitted to contact the items therein, and then removed from the chamber. Only then is the plasma generated. See, for example, attached machine translation page 8, first full paragraph to page 9, first paragraph. Moreover, the plasma is disclosed by Chollet et al. to be generated from "air, oxygen, hydrogen, argon or helium," and moreover is effective to destroy any ozone remaining in the chamber. See machine translation, page 10, first full paragraph. Thus, Chollet et al. does not teach or suggest a step where the ozone and water vapor are injected *until the pressure reaches between 5 torr and 15 torr and the electrical discharge of the plasma is broken*.

Moreover, in the apparatus of Chollet et al. the plasma is generated within chamber **110** from gases **88** using microwave generator **90**. Valve **185** is then opened

Art Unit: 1797

permitting the plasma to flow into sterilization chamber **10**. Thus, sterilization chamber **10** fails to have an electrode arrangement therein. Furthermore, the ozone and water vapor system entering at **40** is in connection only to sterilization chamber **10** and not to plasma generating chamber **110**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
